PROFESSIONAL SUMMARY

Analytical and Success-driven Business Analyst with expertise in transforming raw data into impactful business insights. Proficient in using tools like Power BI, Excel, Tableau and SQL with hands on experience in sales analysis, supply chain optimization. Skilled in data storytelling and presenting findings to stakeholders to drive strategic decision-making. Seeking to contribute analytical and visualization skills in Business Analyst role.

TECHNICAL SKILLS

Data Analysis	Data Modeling
Data Visualization	SQL
Data Transformation	POWER BI
Statistical Analysis	TABLEAU
Requirements Documentation	EXCEL

PROFESSIONAL EXPERIENCE

Analogica

Business Analyst Intern

- As a Business Analyst Intern at Analogica, I applied data transformation, data analysis, data visualization skills to convert raw data into actionable insights supporting business decision-making.
- I utilized tools like Excel, SQL, Power BI to build interactive dashboards and reports, enhancing reporting efficiency by 30%.
- Through trend analysis and pattern recognition, I generated valuable insights, improving decision-making processes by 35%.
- Additionally, I prepared requirement documentation to ensure alignment between business objectives and technical solutions.

EDUCATION

Bachelor's Of Commerce: **April 2021 - May 2024**
Seshadripuram Degree College

PUC - MEBA   **April 2019 - July 2021**
Seshadripuram Composite College

X
Premier High School

PROJECTS

Sales Data Analysis:

Tools:- Excel, Power Pivot, Power Query.
Built an interactive EXCEL dashboard to analyze sales trends, customer behavior, and product performance, using EXCEL formulas for key metrics used the add-ins like POWERPIVOT, POWERQUERY for better visualization.

IPL Data Report:

Tools:- Excel, Power BI.
Transformed raw data into structured data using ETL process in Power Query.
Automated extraction and transformation of raw sports data from diverse sources into a centralized SQL database, facilitating real-time analysis of key performance indicators, and delivered yearly actionable insights

Supply Chain Analysis:

Tools:- SQL, Power BI.

Designed a Supply Chain Report by first importing the raw data into the MySQL workbench to transform the data into structured ones.

Executed all the necessary findings, later connected to Power BI and assessed key metrics like; OTIF, LIFR and VOFR to identify the inefficiencies in deliveries and improve Supply Chain Operations.

World Population Analysis:

Tools:- Excel, Tableau.

Utilized Tableau to visualize population growth, density, demographic trends and geographic norms to provide insights for economic and social impact.

CERTIFICATIONS

Business Analytics - Certisured   **Oct 2024 - March 2025**

Tally Prime - Cadd Nest

ACHIVEMENTS

- **Facilitated Power BI Workshop:**

Served as a Business Analyst instructor at KLE College, effectively teaching various Power BI concepts to students, including Data Visualization, Data Modeling, Dashboard Design enhancing their practical skills, critical thinking abilities and knowledge.

- **Showcased Presentation and Communication Skills:**

Utilized Presentation and Articulation Skills to simplify complex Power BI concepts and by giving real life examples, ensuring clarity and engagement. Facilitated interactive discussions and Q&A sessions, enhancing students learning experience.
